EMILIO RODRIGUEZ BRICEÑO
Software Engineer

I am a student of Information Technology, passionate about web and mobile development, with high expectations for learning. I am a very polite and respectful person, always willing to help and learn. As a web developer, my main expertise lies in the client-side, using the React framework. Additionally, I have skills on the server-side, utilizing Node.js.

MOST RECENT WORK EXPERIENCE

Project Manager | Grupo Servicios Integrales en Tecnología **|** Oct 2022 - Dec 2023

- Managed all aspects of project lifecycle, from planning and execution to delivery.
- Utilized Scrum methodology, change management principles, and effective client communication to ensure project success.
- Maintained rigorous quality management procedures and comprehensive project documentation.
- Successfully implemented Scrum in various projects, increasing efficiency and productivity.
- Developed user manuals for all projects, facilitating smooth user adoption and knowledge transfer.
- Led effective client meetings, building strong relationships and fostering collaboration.

QA Tester | Grupo Servicios Integrales en Tecnología | Oct 2022 - Dec 2023

- Performed comprehensive manual and system testing on mobile and web applications.
- Created and automated test scripts for efficient and reliable testing processes.
- Developed and executed test plans to ensure thorough coverage of functionalities.
- Identified, documented, and reported bugs effectively, contributing to quality improvement.
- Played a key role in ensuring the release of high-quality mobile and web applications.
